GIVING OUR STUDENTS A WORLD OF CHOICES

NAF

NATIONAL ACADEMY FOUNDATION

The National Academy Foundation (NAF) is an acclaimed national network of high school career academies predominately based in urban districts-schools within schools with rigorous, career-themed curricula created with current industry and educational expertise. Each year, NAF serves more than 53,000 students in over 500 Academies in 41 states, the District of Columbia and the U.S. Virgin Islands through the Academy of Finance, the Academy of Engineering, the Academy of Hospitality & Tourism, and the Academy of Information Technology. NAF Academies represent business/school partnerships that prepare young people for future careers through a combination of school-based curricula and work-based experiences. Founded by Sanford I. Weill, Chairman Emeritus of Citigroup Inc., NAF is a partnership between business leaders and educators. Employees of more than 2,500 businesses support NAF students by securing internships, volunteering in classrooms, acting as mentors, and serving on local Advisory Boards.

Academy of Finance (AOF)

Established in 1982 in New York, the Academy of Finance (AOF) introduces high school students to the broad career opportunities of the financial services industry, opening the door to new options and equipping students to make sound choices for the future. One of four member programs of the National Academy Foundation, the AOF is operating in more than 243 high schools nationwide.

Academy of Engineering (AOE)

The Academy of Engineering (AOE) was developed in 2007 in collaboration with Project Lead The Way (PLTW) and the National Action Council for Minorities in Engineering

(NACME). The goals of the AOE are to: recruit and encourage more high school students to choose careers in engineering and engineering technology; increase the participation of women and underrepresented minorities in the study of engineering; and prepare high school graduates to enter postsecondary engineering and engineering technology programs, fully competent in required mathematics, science, and technical subjects.

Academy of Hospitality and Tourism (AOHT)

Launched in 1987 in Miami and New York, the Academy of Hospitality and Tourism (AOHT) provides high school students with the requisite knowledge and skills for a successful career in one of the world's largest service industries. This is accomplished through a curriculum that provides an in-depth look at all aspects of tourism and hospitality, including coursework in business, geography, hospitality, and economics. AOHT is operating in more than 95 high schools nationwide.

Academy of Information Technology (AOIT)

With over 120 academies nationwide, the Academy of Information Technology (AOIT) was created in 2000 and provides a program of study that introduces students to the broad career opportunities in today's digital workforce and equips them with the personal, analytical, technical, and communication skills they need to thrive. By introducing high school students to the broad career opportunities of the Information Technology industry, AOIT opens the door to new options through which students are better able to make sound choices for the future.
