

2013 – 2014 Accreditation

Explore Learning: Reflex Math

Reflex Math facts fluency program primarily targets students in grades 2 – 8 and is used throughout all 49 middle schools in Miami-Dade County and selected elementary schools. The key features of the web-based software include fluency checks, coaching, games and rewards. It adapts and individualizes student performance while continuously monitoring student performance. Reflex can be used for targeted intervention by offering explicit instruction and coaching through a customized game experience for students to develop automaticity with basic math skills. Reflex utilizes extensive narration and limits on-screen text which does not interfere with the range of reading abilities.
